

Enhance productivity by
empowering workers to connect
and communicate instantly.

OfficeServ 7070

Samsung OfficeServ 7070 is an IP-PBX optimized for small and medium sized businesses having less than 50 employees. It supports not only VoIP communications, but works perfectly with existing communication infrastructures. Moreover, it provides powerful performance with built-in functions that are essential for small and medium-sized businesses such as CID, Auto Attendant, and Voice Mailing Service.

Easy Installation

- Supports all the call functions of the existing PBX
- Full compatibility with the OfficeServ 7000 series using identical S/W and terminals
- A single, wall-mounted cabinet structure
- Scalability of multiple service boards into the universal slot
- A refined design suitable for small and medium-sized offices

Scalability

- Various line groups can be configured through expansion in 4-line units
- Supports Spnet connectivity with the OfficeServ 7000 series

VoIP Support

Supports 8 VoIP channels without additional equipment

Reduces communication costs by working together with Internet telephony service providers through the SIP trunk support

Provides teleworking solutions through an IP network

An integrated VoIP network can provide seamless collaboration with a remote office

Built-in Applications

Supports Voice Mail, Auto Attendant, and CID function without additional equipment

Equipped with Internal MOH, External MOH, Paging, and Contact

SOA(Service Oriented Architecture)-based Business Solutions

Supports interworking with solutions such as the IP contact center, groupware, video conference call, etc.

Provides the OpenAPI to allow interworking with third party solutions, helping the customer's business.

User-friendly Terminal Lineup

Supports IP phone, video phone, SIP phone, softphone, 3G dual phone, Wi-Fi phone, digital phone, and analog phone

Various Application Solutions

Interworking with various application solutions such as voice mail solutions with a built-in board, integrated fax server, integrated digital voice recording system etc

Unified Web Management

Exports and imports databases

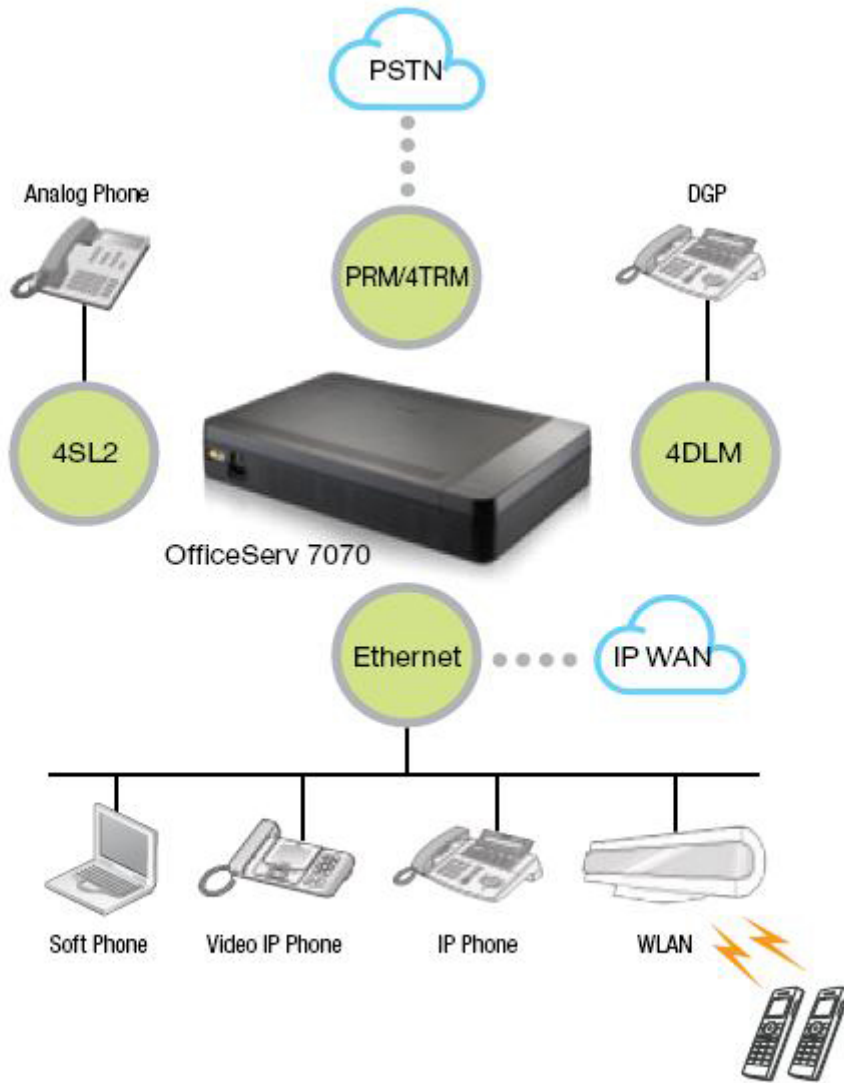

Provides the Export function that exports the databases of a telephone, Voice Mail, and Auto Attendant stored in a system into a client PC through the web

Provides the Import function that imports the databases of a telephone, Voice Mail and Auto Attendant from a client PC through the web

Uploads a system package through the Web with the Package Upload function

Telephone setting functions

Voice Mail/Auto Attendant setting functions
